Objective:

Enthusiastic and detail-oriented web developer with a passion for creating responsive and user-friendly websites. Seeking a challenging position to leverage my skills in HTML, CSS, and JavaScript to contribute to innovative web development projects.

Skills:

-
- Languages: HTML, CSS, JavaScript
 - Responsive Web Design
 - Front-end Frameworks: Bootstrap, React.Js
 - Version Control: Git, GitHub
 - Web Performance Optimization
 - Cross-Browser Compatibility
 - Debugging and Problem Solving
 - Web Accessibility (WCAG)

Education:

[Degree Earned, Bachelor of Science in Computer Science]
[DAVV University, 2023]

Self-Drawing Car Project :

Designed and implemented a dynamic self-drawing car using HTML5 Canvas and JavaScript.

- Utilized the Canvas API to draw and animate the car's components, such as wheels, body, and headlights.
- Implemented smooth animations and transitions to create a realistic drawing effect.
- Incorporated user interactions to control the car's movement, such as starting, stopping, and changing direction.
- Ensured code efficiency and maintainability through modular and well-documented code.
- Created a dynamic self-drawing car using HTML5 Canvas, CSS animations, and JavaScript interactivity for engaging and innovative web development.

Certifications:

JavaScript Course - CuriousJr,Issued June 1,2023

JavaScript Course - GeeksForGeeks, April,2023

Extra Curricular Activities:

- College Kabaddi Player

- Demonstrated teamwork, discipline, and leadership as an active member of the college kabaddi team.
